# *Senior Social Activities*

## *Senior Social Activities*

The first activity of the senior class was their annual magazine drive. The drive was very successful, and the money was used to finance the senior trip and other activities.

October 27—because of the small number in the senior class, a joint junior-senior class play was presented on this date. The proceeds were divided between the two classes.

On December 11 the seniors attended the Governor's Youth Traffic Safety Conference at Mankato. On February 24 Wilton and Vivian Lentz represented our school at the State Traffic Conference.

A Career Day was held for the seniors of neighboring schools in Mapleton on February 5th. Representatives from various institutions spoke to the seniors about their schools and their functions.

In the early part of the spring the seniors took off a half day to visit the mental hospital in St. Peter. They were all very impressed with the trip.

April 3—The juniors and seniors visited the state Capitol, observing both houses in session and taking a tour of the Capitol to acquaint themselves with the operations of our state government.

May 8—The juniors and seniors had their banquet. This year it was held at Eibner's, at New Ulm.

The senior class trip is one of the highlights of the senior year. This year seniors went on their class trip the weekend of May 21-24.

May 29 closed the school life of the 1959 seniors. On that night, commencement exercises were held in the school auditorium at 8 p.m. Mr. William Wettergren, of St. Peter, was the speaker.

# *Class History*

## *Class History*

September 1955 found thirteen students registering at GTHS as freshmen—five girls and eight boys, beginning their first year of high school.

To get us off to a good start the sophomores initiated the boys in ladies' costumes and the girls in men's costumes. To add to the excitement of the day, we were given a party at night at which we were told to act out different personalities. We took time for revenge when we gave a freshman return party.

Our sophomore year began with twelve students. We lost Mary Pat FitzSimmons, who enrolled at Good Counsel, and Opal Peterson, who moved out of the state, but we gained Marie Masters, who came from Lyola. We abolished the initiation and started class parties, each class putting on one party a year.

In the fall of 1957 we lost Tammy Crane, who enrolled in a school in Iowa; which left us with eleven. This year we had an enjoyable trip with the seniors to the Ice Follies.

Our senior year left us with still a smaller group. Lyle Bartsch decided to finish at Waseca Agricultural school, Marie Masters and Carol Sternitzke left school to be married. We were much grieved by Frank Vaughan's unexpected death during the summer of our junior year. We were happy to gain Jerry Patton after our first semester. This left us with a total of seven proud seniors waiting for Commencement.

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research.

2. The second part of the report is a detailed description of the methodology used in the study. It includes information about the sample size, the data collection methods, and the statistical analysis techniques.

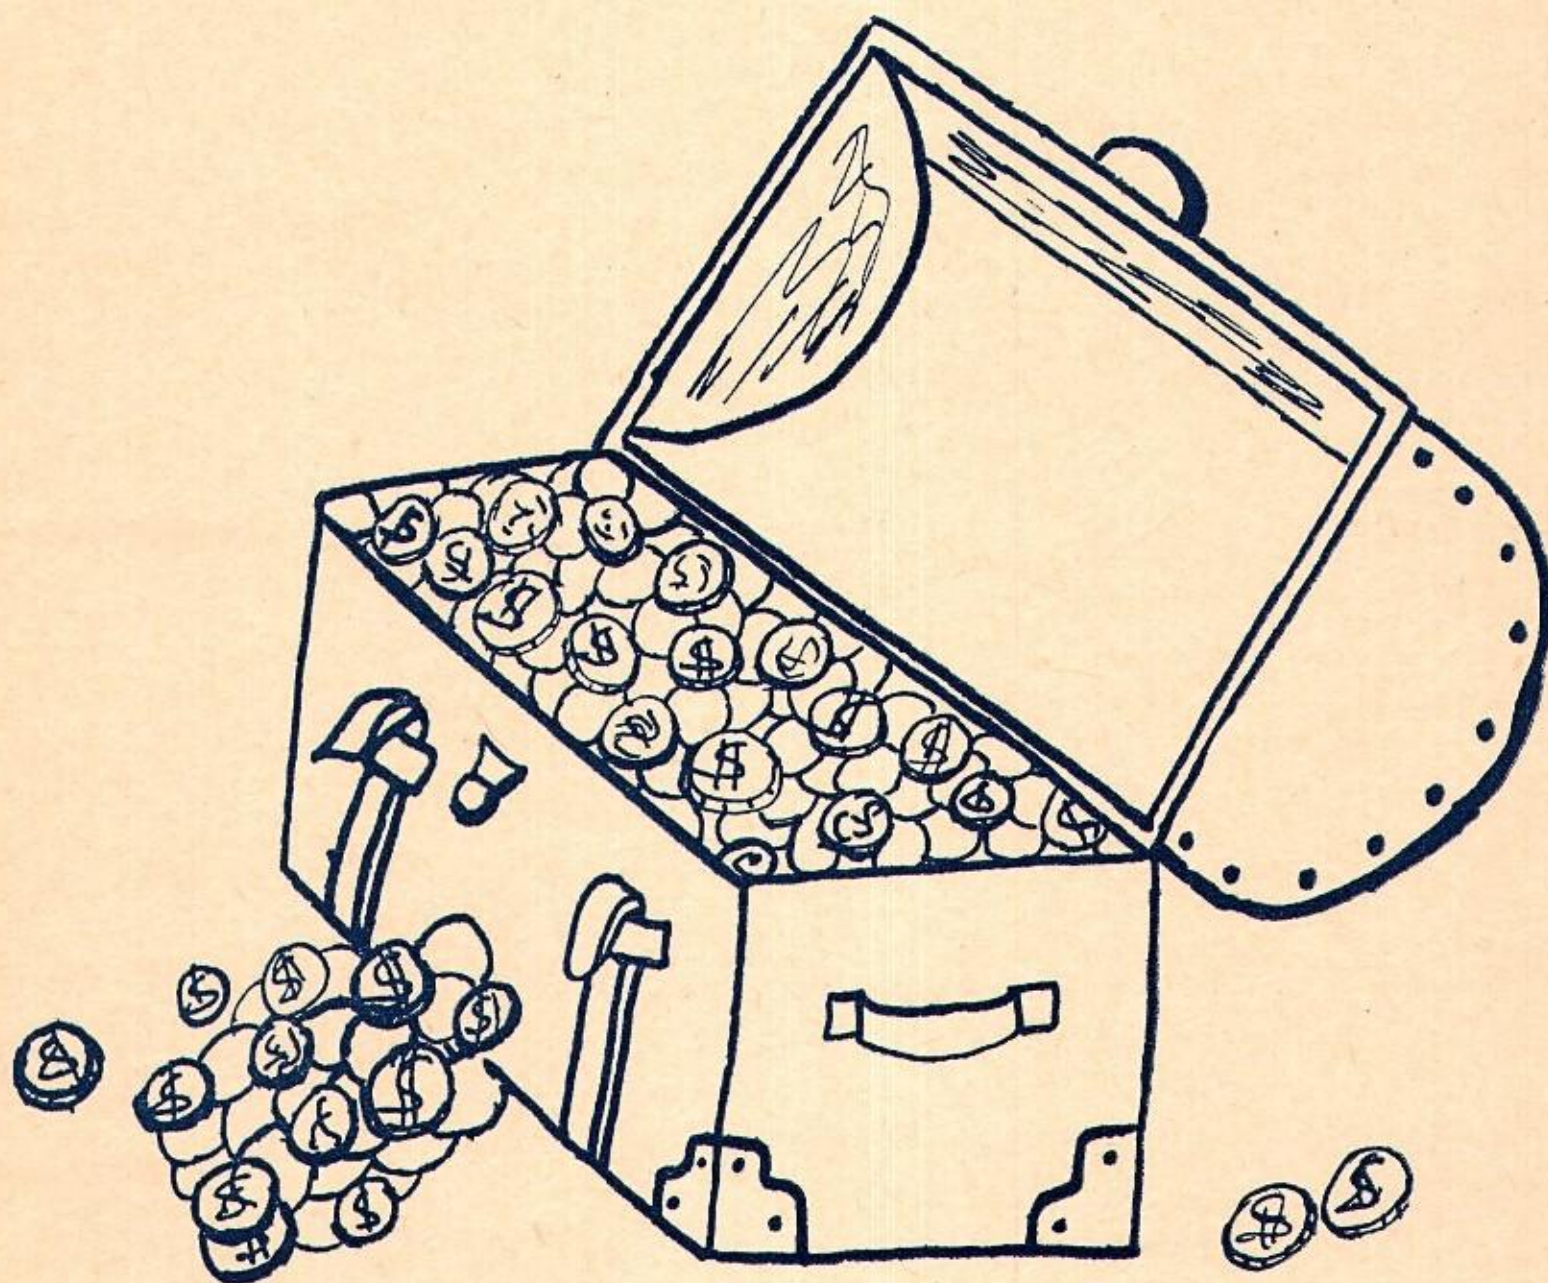

3. The third part of the report is a discussion of the results of the study. It presents the findings of the research and discusses their implications for the field of study.

4. The fourth part of the report is a conclusion and a summary of the main findings. It also includes some suggestions for further research.

5. The fifth part of the report is a list of references. It includes all the sources of information used in the study.

# *Senior Prophecy*

## *Senior Prophecy*

DEANNA: Deanna was set on being an airline stewardess. But as fate would have it, her first plane didn't take off because of a break in the fuel line. This discouraged Deanna. She is now a test driver for GMC—she tests their new tanks.

CURTIS: As you know, Curtis was very brilliant. He got his B. S. degree from MSC and joined the beatniks. He now plays flute for a jazz combo called the "Beat-Big Beats." He decided intellectual life was not for him.

JOHN: After finishing high school he went to the University of Minesota Farm School. He is now happily married and is raising 25,000 ducks a year. He decided to save a lot of work by crossing geese with ducks and is raising only one brand of fowl—GUCKS??

WILTON: While Wilton was in school he was quite an inventor. After he finished school he got a job at General Electric. During the first week, he isolated a new material and named it Lentzium. He hasn't been able to use it, due to the fact that it explodes upon contact with any element on the atomic chart. Wilton has never looked the same since he invented it.

JERRY: As we know, Jerry was quite a comic in school. It seems as if this paid off because he has become an all night-all day disk jockey on W.D.G.Y. He is just great, but he claims his job is getting him down and he may join Wilton in his search for a use for LENTZIUM.

MARVIN: As soon as school was out, Marv settled down and got married. He took over his father's farm, but he got sick of that and turned to politics. I hear he is running for Vice President of the United States—and hopes he will take first place in the 400 yard dash and bring home the championship to the White House.

CEDRIC: Cedric continued his interest in basketball after graduation and is now the owner of the "Globe Trotters A la Prange". They toured the world on their trips with Cedric averaging 41.99 points per game. This is a girls' team. Lucky Cedric!!!!

1. The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the origin of life, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that the conditions of the early earth were such that the formation of organic molecules was a natural consequence of the physical and chemical processes going on at the time.

2. The second part of the paper is devoted to a detailed discussion of the theory of spontaneous generation. The author shows that this theory is based on the fact that the conditions of the early earth were such that the formation of organic molecules was a natural consequence of the physical and chemical processes going on at the time. The author discusses the various theories of the origin of life, and shows that the most plausible is the theory of spontaneous generation.

# *Music*

## *Music*

Musical activities play a big part in the extra curricular activities in high school. Mr. H. J. Brandrup directs the chorus, band and other musical groups. We feel that the success of our music department is largely due to the wonderful direction of Mr. Brandrup.

## *Chorus*

Our chorus this year consists of 40 members, which includes most everyone in high school. Our biggest musical event is the spring music festival, held this year on March 9th at Mankato State. The results were excellent, we received an 'A' rating and were praised on our wonderful tone and balance. The chorus also sang at the Christmas program and at the Spring Concert. We are very proud of our chorus.

## *Band*

The band has received many new members this year. It also took part in the spring Music Festival on March 13th at Nicollet high school. In spite of the fact that our band is relatively small, we still hold our own in competition with the larger bands. The band also participated at our Spring Concert at school.

## *Small Groups*

The Brass Trio and the Boy's Quartet are the two small groups in our musical department. Those in the brass trio are Roger Raether, Sandy Glaeser and Dean Attenberger. Marv Birr, Don Ziemann, Charles Medalen and Bill Beschnett make up the quartet. Both groups have entertained at a number of school events and made very good showings. They both plan to enter a Small Groups' Music Festival later in the spring.
